PET - Sheath/core

*Sheath - non-dyeable.
Core - dyeable*

N/A

ABSTRACTED-PUB-NO: JP 70004434B

BASIC-ABSTRACT:

The method comprises dyeing a core-sheath type polyester filament with a chelating dye, wherein the filament core is capable of forming chelating links with the dye and comprises (a) a polyester component containing at least 70% of polyethylene terephthalate and (b) at least one metal compound represented by the formula: (wherein R is alkyl or cycloalkyl; R1 and R2 are alkyl, aryl, alkyl aryl or cycloalkyl; M is Co, Ni or Zn), and wherein the filament sheath is not capable of forming chelating links with the dye and contains at least 70% of polyethylene terephthalate.
